

# WHAT IS A MODBOX

---

The Modbox is a modular storage system for card games with unmatched versatility! It's ideal for living card games--Marvel Champions, for example--or for those games with a large number of expansions, like Dominion. A variety of STACKERS that expand and interlock with the MODBOX allow for multiple different storage solutions for all your favorite games. You can even stack our STACKERS on top of each other. These boxes are made of high quality Baltic birch and are even designed to fit into the ubiquitous Kallax.

Since there are so many options for the MODBOX, it can be hard to determine what you actually need to store your game. We've created a guide to help determine the best solution for one of our favorite games, Marvel United! And for any additional questions, feel free to reach out to us at [SayHello@TablePlay.com](mailto:SayHello@TablePlay.com)

## STORE ONLY THE CARDS

---

First, determine if you want to store your cards vertically or horizontally. Vertical storage typically gets the most into the MODBOX. Our vertical and horizontal dividers are an easy way to sort your collection and fit perfectly in the MODBOX.

Check out our Marvel United dividers on [TablePlay.com](https://TablePlay.com) or [Etsy.com/Shop/TablePlayGames](https://Etsy.com/Shop/TablePlayGames).

# STORE THE CARDS, LOCATIONS & DASHBOARDS

---

We created two custom MODBOX STACKERS for Marvel United.

## MODBOX STACKER - MARVEL UNITED LOCATIONS

- Can store all the CARDBOARD locations for a SINGLE season (either Classic or X-Men. You'll need two to store both seasons)
- Can store all NORMAL locations for BOTH seasons.

## MODBOX STACKER - MARVEL UNITED DASHBOARDS

- Can store all the CARDBOARD dashboards for a SINGLE season (either Classic or X-Men. You'll need two to store both seasons)
- Can store all NORMAL villain dashboards for BOTH seasons.
- NOTE: This will NOT store the hexagon dashboards or the central dashboard. We suggest a "Rules Stacker" to store those along with your tokens and manuals.
